Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A "\*" following a place name indicates that the place is coterminous with a MCD. A "Δ" indicates that the place is also a false MCD; the false MCD name is shown in parentheses.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity, without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an individual's tribal affiliation. A tribal census tract is not a county, state, or off-reservation trust lands cross state or county boundaries; the same tribal census tract number may be assigned on both sides of the boundary, even if, in fact, the jurisdiction is different.
- 3 A "\*" following a block number indicates that the block number is repeated elsewhere in the block.
